

The Litany - Information about the Tech used in Organized Stalking and it's Methodology

This is the litany of Organized Stalking technologies in use against people all around the world that I have compiled.

I have been introduced to an exciting world of technology and I thought that you might find some of these subjects interesting!

- **Here is a great video to introduce you to the concept and an informative look at the scope and breadth of the system that is already in use around the world, from an insider with functional knowledge of the program.**

<https://youtu.be/bwft2-gqG5M>

Now these things taken separately are all very interesting items. But when you apply them as if conducting a symphony, now that's when they really start to get scary! Example: Giving painful biofeedback when a person has a thought that counters your intended programming, along with a v2k transmitted threat or warning while also making the lights in your house flash. All of this is exquisitely tuned and timed to create the impression of a religious or at the least very significant experience. Maybe even to simulate alien contact. Really nothing is beyond the realm of imagination with this tech.

The basis of this program is mind manipulation, the end goal is to create a set of predictable programmed responses in a specific or host of subjects. We're dealing with a massively implemented assault on our lives using dark psychology to manipulate, murder, and enslave innocent people across the world.

- **Dark Psychology:** This can be seen as the study of the human condition, in relation to the psychological nature of the different kinds of people who prey on others. The fact is that every single human being has the potential to victimize other people or other living creatures.

- **Hypergame Theory:** Defining the field of play and obscuring motives/methods –This is how to create a scenario where you pretend to be helping someone, but in fact are accomplishing any number of ancillary goals. I cannot stress enough how important this theory is to keeping the program and all of its components hidden.

- **V2k: Voice to Skull communication.** Can you imagine projecting voices directly into someone's head? This is the bread and butter, the veritable life-blood of this program. The ability to relentlessly drive input directly to someone's head has several purposes. At the least it keeps a person off-balance and prevents them from clear thinking or even meditating. Can you imagine someone screaming in your ear, incessantly with the only visible goal being to make you unstable?

- **Computer Voice Mimicry:** This is how the AI communicator can sound like anyone that you can think of. When you integrate this with the V2k you get the special added effect of imitating anyone a person can remember or imagine by recreating their voice. You can EVEN use their impression of what GOD would sound like to trick them into believing that they're speaking with Him directly. What could possibly go wrong with this? This is how Tupac plays Coachella and Val Kilmer got his voice back.

- **Psychic Driving:** Also use this in combination with v2k to try to brainwash subjects, see also chainless slaves below.
<https://amp.en.google-info.org/1999552/1/psychic-driving.html>
- **NLP: Neuro Linguistic Programming:** Imagine someone doing this continuously to you, remotely, in an unblockable way, using the voice to skull. Nasty, right? This means that while working on your head relentlessly with the V2K, they can also use mentalist tricks to prompt you to give up information that will lead to them having a more complete idea on how to manipulate you. For instance, they can start a sentence by saying something to you like: "The most embarrassing moment of my life was..." and then you think of that moment and voila! Now they are using psychic driving to constantly remind you of that moment and using it to hurt and manipulate you.

- **Remote Neural Monitoring:** This is the hard sell to most people, so many people are unwilling to fathom the idea that their thoughts are no longer private. The very idea is an affront to the very nature of our beings. I am sorry to say that we are there, and that this is a reality. What's bad is that it was used to mine all of our heads to help create this monstrosity, individually selecting the necessary candidates to make this a reality - the willing participants. Even worse, it is additionally being used in the most horrendous way possible. To extort, coerce, and blackmail anyone with a sufficiently dark enough secret to participate in this program. Even if the secret isn't really damaging, a subject can still be convinced that participating is the only alternative to the truth getting out. Even a small task, seemingly innocuous, helps to further the aim of the program as a whole, which operates on a hive mind with the intend to always be pushing its goals forward.

- **Synthetic Telepathy:**
<https://rense.com/synthetictelepathy.pdf>
- **Transcranial Magnetic Stimulation aka the God Helmet:** - This is the crown jewel of this program, by using this technology a victim has **NO DEFENSE** against the incoming attacks. This makes the victim more susceptible and open to specifically religious themes. This is the best part! They think that they are talking to GOD. Can you imagine? WOW!!!!!! Again, we all know that any effect that has been done in person is now remotely possible.

- **Predictive Software:** Palantir (or some type of similar program) – This one is the real sleeper, what you do is you combine this with an AI, the ability to read minds, the voice mimicry, the v2k, and the TMS (aka spiritual experience suggestive mechanism) and you basically have God in a can, - you can send him to anyone's head with the goal to give them the experience of a lifetime. (Let me tell you, mine was great!!!!)

Here are some more, just for fun ideas!!!!

- **AlterEgo:** How someone can listen to the thoughts in your head. Of course, technology being what it is, this is now remotely possible.

- **Technology to analyze moods:** Imagine someone who wants to take advantage of how you're feeling.

- **Mind Reading:** New Tech to pull information out of subjects, now this bad boy. Holy cow, imagine all of the damage someone could do with this... and again... we all know that any effect that has been done in person is now remotely possible.

This is the culmination of about 3 years of research, I have so much more. I can imagine that a group of 'contractors' or 'consultants' outsources most of this stuff or at the very least it's broken down into different corporations. Can you imagine someone trying to trick you into thinking that you spoke with God? I cannot imagine a less Christian thing to lie about.

- **Here are some other news stories related to the technology, it seems like it causes problems to those who have been subjected to it, scary!**

- **The latest map of voluntarily listed targeted individuals:** This is a list of 10,000 people that have had their lives so completely ruined that they were willing to give up their name and location to anyone, anyone in the world that is willing to help them. Do you want to know a secret? It only stopped at 10,000 because that's the limit to the number of pins that you can put on a google online map.
THIS IS THE SECOND COMPLETE MAP OF 10,000 PEOPLE

The program can be summed up as follows **"False doctrine uses force to convict conscience"**

The loose interpretation is that someone is using spiritual teachings from the Bible and other religious or spiritual texts in a perverted way to push this program forward.

I hope that this information finds you in good spirit and health,
